**IAS Helps Diffuse Any Possible Confusion During A Crises By Providing
Multi-lingual Alert Option To Fast Alert® Incident Warning and Management System**

PORT ANGELES, WA—June, 2008—Incident Alert Systems (IAS) of Port Angeles, Washington announces the availability of a menu of multi-lingual (English and Spanish) alert options as the newest feature of its Fast Alert® incident management and security system. Furthering its commitment to the safety and well being of its customers, IAS has added the bi-lingual element to accommodate staff, teachers and students for whom English is a second language. IAS proprietary software makes available a menu of alert options, including lockdown, evacuation, shelter-in-place and all-clear alarms.

"We are pleased to be able to offer this new multi-lingual option to our customers," states Tom Reyes, President of Incident Alert Systems. "A time of emergency or crises is not the time for confusion, and that is the reason we have added the option of two languages for all alert announcements by Fast Alert®. This systems mobile, all platform, management capability empowers those charged with managing an emergency to quickly and accurately sound the appropriate alert in one or more languages as needed, making sure everyone is clearly informed."

When combined with a well organized safety plan, Fast Alert can help school personnel prevent unnecessary confusion and turmoil in any emergency. This innovative system can be installed in many configurations at a very low cost, leveraging existing data networks and integrating with existing intercom systems or added amplified speakers. It can be activated by cell phone, PDA, tablet computer, laptop or desktop computer.

Fast Alert®, which has been awarded a US patent and has International patents pending, is a computer-enabled, incident warning and management system designed by IAS for direct and immediate communication between teachers, staff and first responders during emergency situations, whether man made or natural in origin.

About Incident Alert Systems

Founded in 2004, Incident Alert Systems strives for the goal of preserving human life and providing a safe and healthy learning environment for children and educators. IAS works closely with agencies such as the Washington State School Safety Advisory Committee and the Washington Association of Sheriffs and Police Chief's to ensure that all products meet the needs of those professionals who would be directly responsible for managing critical incidents.
