

FOR IMMEDIATE RELEASE

Incident Alert Systems and Innovation Law Group Attain Second Patent For Fast Alert® Incident Warning and Management System

PORT ANGELES, WA—October, 2008—Incident Alert Systems (IAS) of Port Angeles, Washington and **Innovation Law Group** of Sequim, Washington announce the receipt of a second patent from the US Patent & Trademark Office for Incident Alert Systems' Fast Alert® Incident Warning and Management System. Incident Alert Systems, through a series of pioneering innovations is quickly becoming the leading manufacturer and supplier of computer-enabled, incident warning and management systems - primarily for schools and universities - throughout Washington and surrounding states. IAS earlier received US Patent 7,277,018. This second patent broadens the scope of the Intellectual Property protection of its systems. IAS also has several foreign patents pending.

The Patented Fast Alert® incident warning and management system can be activated by cell phone, PDA, tablet computer, laptop or desktop computer for direct and immediate communication between teachers, staff and first responders during virtually any emergency situation, to provide warning of imminent or in-progress, potentially life threatening events. In addition, school administrators can give directions via the school PA system to all students and staff on the level of warnings, actions to be taken, and all clear.

Recording functions of the Patented IAS Fast Alert® system gives first responders accurate information from the very beginning of an incident and also later provides law enforcement and school administration with an archival record for management and possible prosecution purposes.

The Patented IAS system is designed to leverage existing data networks and integrate with existing intercom systems or added amplified speakers. The Patented IAS system can be installed in many configurations and, most importantly, at a very low cost.

About Incident Alert Systems

Founded in 2004, Incident Alert Systems strives for the goal of preserving human life and providing a safe and healthy learning environment for children and educators. IAS works closely with agencies such as the Washington State School Safety Advisory Committee and the Washington Association of Sheriffs and Police Chief's to ensure that all products meet the needs of those professionals who would be directly responsible for managing critical incidents. IAS is a leader in the emerging and fast growing school incident prevention and management field.
