Fast Alert® Now Installed At Every School In Washington's Puyallup School District

PORT ANGELES, WA—October, 2009—Incident Alert Systems (IAS) of Port Angeles, Washington announces that Fast Alert® is now installed at every school in Washington's Puyallup School District. Puyallup School District, the ninth largest district in the State of Washington, has installed the Fast Alert Incident Warning and Management system into 100% of its educational facilities with the primary purpose of providing for the safety of students, faculty and employees. The district has twenty two elementary schools, seven junior high schools, three comprehensive senior high schools, and an alternative school, serving close to 22,000 students; all of which now have immediate emergency notification between teachers, staff and first responders via Fast Alert.

"Recognizing the need to ensure proper communications during a life threatening event, administrators from Puyallup School District and Yakima School District have installed Fast Alert at each of their district schools. Fast Alert is also present in many individual schools in other districts in Washington State. During difficult economic times such as we are now facing it is important that we work together, problem solve and bring this life saving technology into all Washington schools," said Tom Reyes, President of Incident Alert Systems.

Patent protected Fast Alert® is a bi-lingual, computer-enabled, incident warning and management system with mobile, all-platform, management capability. The system can be activated by cell phone, PDA, tablet computer, laptop or desktop computer for direct and immediate communication, providing warning of imminent or in-progress life threatening events. IAS proprietary software makes available a menu of alert options, including lockdown, evacuation, shelter-in-place and all-clear alarms. The system can be installed in several configurations, the most common being integration with an existing intercom system with a connection to the data network. By utilizing Infrastructures already in place, the Fast Alert system can be introduced as a retrofit upgrade at a very low cost.

About Incident Alert Systems

Founded in 2004, Incident Alert Systems strives for the goal of preserving human life and providing a safe and healthy learning environment for children and educators. IAS works closely with agencies such as the Washington State School Safety Advisory Committee and the Washington Association of Sheriffs and Police Chiefs to ensure that all products meet the needs of those professionals who would be directly responsible for managing critical incidents.
