**Washington State's Stanwood High School Chooses Fast Alert®
Incident Warning and Management System For Emergency Notification**

PORT ANGELES, WA—August, 2008—Incident Alert Systems (IAS) of Port Angeles, Washington announces the installation of its Fast Alert® incident management and security system at two facilities of the Stanwood High School in Stanwood, Washington. The public high school, which enrolls approximately 1,810 students from grades 9 through 12, is well known for its proactive policies providing for safety and security.

Consistent with its high standard of safety policies, Stanwood High School is a closed campus, which means that students remain on campus from time of arrival until the close of the school day. Stanwood High School students are also issued school I.D. cards that must be carried on their person at all times while on campus or at school sponsored events. The decision to purchase and install the Fast Alert® Incident Warning and Management System for Emergency Notification provides one more layer of safety for students, teachers and facility employees.

The Fast Alert® is a computer-enabled incident management and security system designed for direct and immediate communication between teachers, staff and first responders during emergency situations of every variety. The system, which holds a US patent and has International patents pending, is deployed in schools all across the state of Washington and across the United States.

IAS proprietary software makes available a menu of multi-lingual (English and Spanish) alert options, including lockdown, evacuation, shelter-in-place and all-clear alarms. When combined with a well organized safety plan, Fast Alert can help school personnel prevent unnecessary confusion and turmoil in any emergency. This innovative system can be installed in many configurations at a very low cost, leveraging existing data networks and integrating with existing intercom systems or added amplified speakers. The system is activated by cell phone, PDA, tablet computer, laptop or desktop computer.

About Incident Alert Systems

Founded in 2004, Incident Alert Systems strives for the goal of preserving human life and providing a safe and healthy learning environment for children and educators. IAS works closely with agencies such as the Washington State School Safety Advisory Committee and the Washington Association of Sheriffs and Police Chiefs to ensure that all products meet the needs of those professionals who would be directly responsible for managing critical incidents.
