**Steilacoom School District Selects Fast Alert® Incident Warning and
Management System
To Safeguard Newly Renovated Pioneer Middle School**

PORT ANGELES, WA—October, 2008—Incident Alert Systems (IAS) of Port Angeles, Washington announces the decision by historic Steilacoom School District, of Washington State to install the computer enabled, Fast Alert® incident warning and management system at its newly renovated Pioneer Middle School. This is the second installation of Fast Alert for the Steilacoom District, whose goal is to improve the safety and security of its students, faculty, and staff in the event of an emergency. The new middle school building contains 106,000 square feet of space for approximately 550 students divided among the 6th, 7th and 8th grades.

“Our Fast Alert incident warning and management system provides critical and timely information alerts and warnings in real time to an entire school campus during emergency situations,” states Tom Reyes, President of Incident Alert Systems. “The Steilacoom School District is one of many who have tried Fast Alert at one or more of their facilities and then continued to order it for installation at remaining facilities, demonstrating that public schools are finding great value in our product.”

Fast Alert can be installed in many configurations at a very low cost, making it a win-win opportunity for schools, school districts and campuses, as they react to recent school related tragedies and look for ways to enhance on-site safety and security processes. The system is designed to leverage existing data networks and integrate with existing intercom systems or added amplified speakers. It can be activated by cell phone, PDA, tablet computer, laptop or desktop computer for direct and immediate communication between teachers, staff and first responders during emergency situations, providing warning of imminent or in-progress life threatening events. Fast Alert has been awarded US patents and International patents are pending.

About Incident Alert Systems

Founded in 2004, Incident Alert Systems strives for the goal of preserving human life and providing a safe and healthy learning environment for children and educators. IAS works closely with agencies such as the Washington State School Safety Advisory Committee and the Washington Association of Sheriffs and Police Chief's to ensure that all products meet the needs of those professionals who would be directly responsible for managing critical incidents. For more information about IAS and Fast Alert®, please call (360) 452-4502 or visit the web site at www.iasglobal.org
